

IVI Enterprise Innovation & Agility

Introduction and overview

What is it?

IVI's Enterprise Innovation & Agility is an integrated capability supporting the cultural, structural, and practical changes needed to transform to a more agile and innovative organization.

Enterprise Innovation & Agility draws on IT-CMF capabilities focused on innovation management, change, user experience (UX), relationship management, and value management.

This focuses an organization's effort on:

- Developing a **culture** of innovation and agility
- Innovation and agility **leadership**
- Implementing **structures and supports** to encourage experimentation and manage risk
- Enabling **collaboration and knowledge sharing** through formal and informal networks
- Developing team **agility, creativity, user and value** orientation
- **Embedding and accelerating** innovation outcomes

Enterprise Innovation & Agility and IT-CMF

Foundational Capabilities

- Innovation Management
- User Experience
- Organizational Change Management
- Relationship Management
- Benefits Assessment & Realization

Secondary Capabilities

- Leadership
- Governance
- Funding & Financing
- Organizational Planning & Design
- Portfolio Management
- Project Development

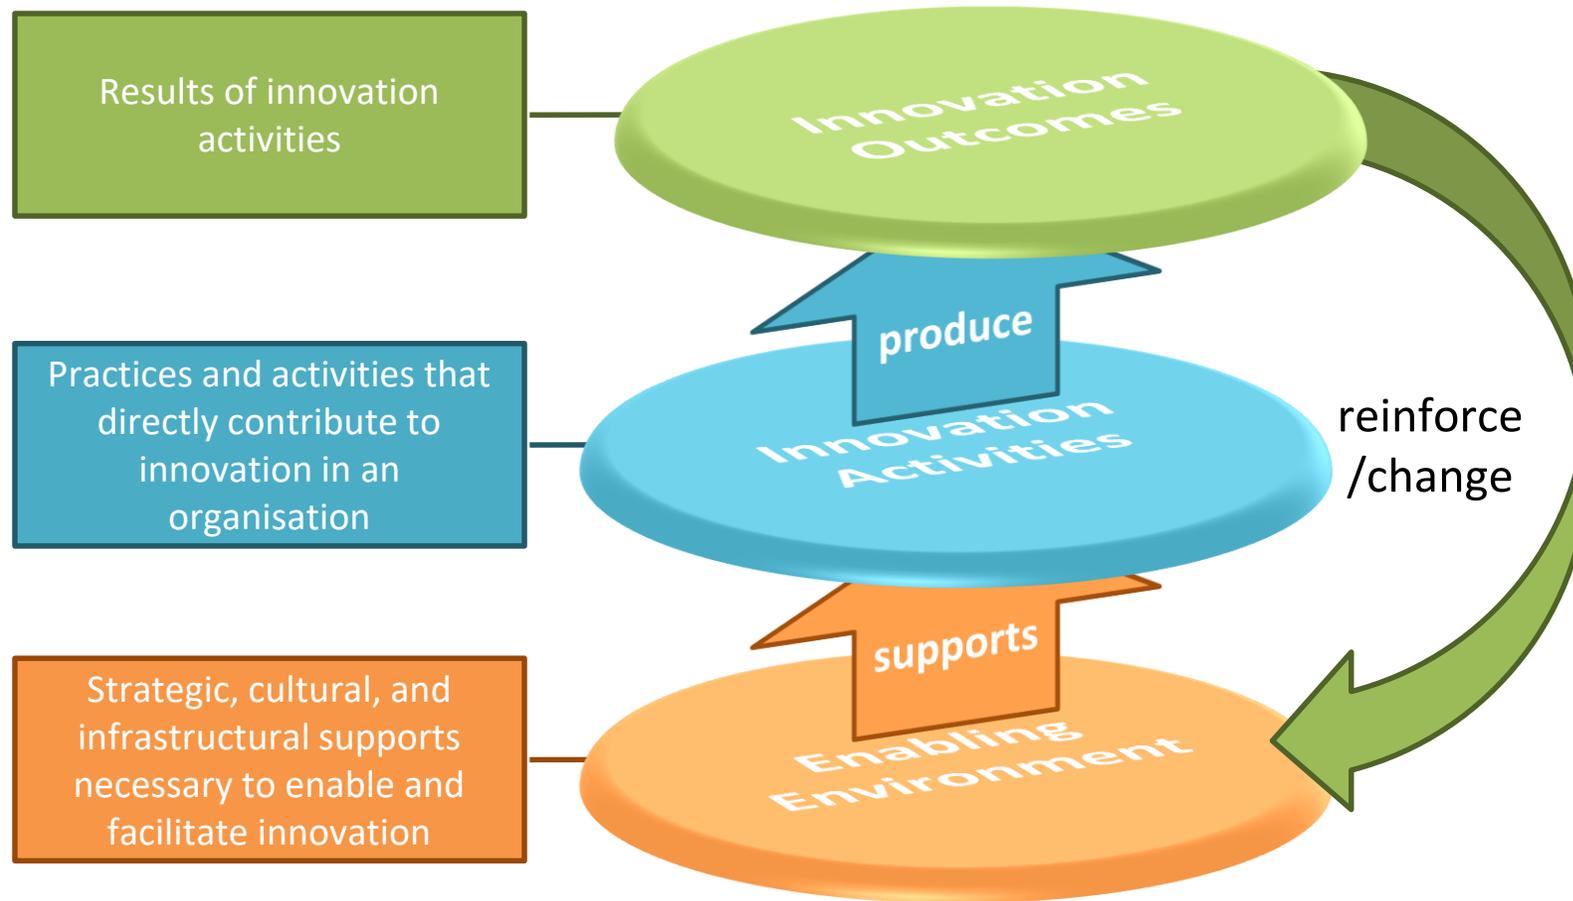

Innovation & Agility

Academic & Practitioner Literature

- Open Innovation
- Disruptive Innovation
- Innovation Value Chain
- Diffusion of Innovation
- Innovation Culture
- Innovation Management

Draws on capabilities across the framework

Three layers to build towards enterprise-wide innovation capability...

Enterprise-wide Innovation & Agility

Enabling Environment			Innovation Activities		Innovation Outcomes	
Vision & Alignment	Culture	Networks	Ideation	Conversion	Diffusion	Realise Benefits
Vision	Management Leadership	Team Formation	Innovation Approaches	Portfolio Management	Communicate Value	Measure Impact
Innovation Strategy	Acceptance of Risk Taking	Collaboration	Discovery	Project Development	Scaling	Reflection & Learning
Innovation Governance	Skills Development	Network Development	Prototyping			Embedding Innovation
Funding & Resource Allocation	Performance Management		Evaluation			
Alternative Structures & Supports	Rewards & Recognition					

Interactive Innovation Workshops

Topic	Enabling Environment	Innovation Activities	Innovation Outcomes
Facilitator	Sinéad Murnane	Louise Veling	Hugo de Sousa
Venue	Room 10	Room 11	Room 12
Outline	<p>This workshop will focus on how organisations can foster and encourage an environment that enables and supports innovation.</p> <p>What challenges do organisations face and what practical measures can be put in place to help develop an innovative culture?</p>	<p>This workshop will focus on the ‘Ideation’ pillar of ‘Innovation Activities’ in the Enterprise Innovation & Agility framework.</p> <p>It is a fast-paced, light-touch and action-oriented introduction to Design Thinking, which will touch on topics such as customer feedback, collaboration, qualitative methods, rapid prototyping, and evaluation.</p>	<p>This workshop will explore how organisations can leverage the success and learnings from innovation in the longer term.</p> <p>What do organisations need to build and embed a sustainable approach to innovation? How do organisations define and measure innovative success?</p>

Spaces in each workshop are limited.

Please use the sign-up sheets posted at the Registration Desk to select your workshop.

‘Enabling Environment’ **Fostering an innovative organisational culture**
